EXECUTIVE SUMMARY

Anton got an introduction to programming in high school, where he fell in love with it. He has an understanding of computer architecture since his major in college was Electronic Engineering. Now, he is highly motivated to get a job in the software engineering field.

Anton's coworkers described him as determined, tenacious, and with the ability to learn quickly and who will not let down his team. In addition, Anton has an extensive experience in problem-solving, situation-handling, and accountability, which he mastered when he had been managing two apartment complexes.
