Executive Summary

Having discovered my passion for programming in high school. My major in college was Electronic Engineering, which provided me with a solid understanding of computer architecture. During this time, I gained an experience working with C++ and MySQL. Currently doing MERN Stack. Additionally, my extensive experience in problem-solving, situational handling, and accountability was honed through my management of two apartment complexes. Coworkers described me as determined, tenacious, and with the ability to learn quickly who always prioritizes team success.

Projects

Salem Crown Apartments Website
Full Crud MERN App with JWT authorization
for admin side for listing available apartments
for Admin side go to /principal, use email:test@user password: testuser

Web Demo
Code

Trivia Game
Game based on jservice API
