Executive Summary

Firstly introduced to programming in high school, and where fell in love with it. Have an understanding of computer architecture since my major in college was Electronic Engineering where got some experience with C++ and MySQL.

Now highly motivated to work in the software engineering field.

Coworkers described me as determined, tenacious, and with the ability to learn quickly and who will not let down the team.

In addition, I have an extensive experience in problem-solving, situation handling, and accountability, which mastered while had been managing two apartment complexes.

Projects

Salem Crown Apartments Website
Full Crud MERN App with JWT authorization for admin side for listing available apartments
